

KantanLQR™

A language quality review tool to automate and formalise the evaluation of translation quality from Kantan Custom Machine Translation engines

KantanLQR™ is designed for Project Managers (PMs) and Reviewers. It is an online quality review tool dedicated to making human evaluation of Custom Machine Translation (CMT) faster, seamless and more efficient. It dramatically reduces the time required to build production ready MT engines.

INCREASE PRODUCTIVITY

Get faster translation project turnarounds with KantanLQR™. It removes the need for static forms and offers an automated review workflow, with reviewer feedback used to improve engine quality.

MONITOR PROGRESS

Monitor and track the progress of projects in real time with instant and highly visual reports. PMs can view the overall quality of an MT engine, stopping the review process when engines reach the desired quality.

CUSTOMISE PROJECTS

KantanLQR™ enables flexible language quality review with its custom Key Performance Indicators (KPIs), which are based on the Multidimensional Quality Metrics (MQM) standards.

Automated

Create automatic human evaluation workflows for Custom Machine Translation engines

Flexible

Apply KantanLQR™ review feedback and post-edits to KantanMT engines for rapid quality improvement

KantanLQR Key Performance Indicators at a Glance

High-Level Evaluation

Error Typologies

KantanLQR™ Granular-Level Reports

The error typology scores show the percentage of segments containing an error of each type, over the total number of segments. It also shows the percentage of error-free segments and the distribution of the error subcategories, e.g. tags, locale adaptation, spacing.

The high level evaluation scores represent the average overall quality of the MT output. Granular-level reports are available by hovering over the different sections of the chart and bar graph. KantanInsight™ provides an interpretation of the result and tips for MT engine re-training.

"KantanLQR™ has taken the quality review process up to a new level, increasing project managers' efficiency by providing instantaneous and detailed analysis at any stage of the LQR project."

Project Manager, KantanLQR™ Early Adopter

"KantanLQR™ is a significant improvement from the manual spreadsheet, which helps with project coordination and saves tons of time."
